

PEDRO ROSA

COMPUTER ENGINEERING STUDENT

CONTACT

+ 351 963231991

PedroRosa@gmail.com

Santarém, Portugal

EDUCATION

2025 - 2026

**BSC IN COMPUTER
ENGINEERING**

- Universidade Lusófona

2023 - 2025

**HIGH SCHOOL DIPLOMA IN
SCIENCES**

- Escola Secundária do
Cartaxo

HOBBIES

- Coding personal projects
- Learning new technologies
- Problem-solving challenges
- Gaming (strategy / logic-based)
- Hardware tinkering & PC building
- Creative building
- Football

LANGUAGES

- English (Intermediate)
- Portuguese (Native)
- Spanish (Basics)

PROFILE

Computer Engineering student at Universidade Lusófona with a solid background in Sciences. I am passionate about how technology solves real-world problems and I am currently focused on mastering software development and programming logic. I am a fast learner, dedicated to academic excellence, and eager to contribute to innovative projects while building my career in the tech industry.

ACADEMIC PROJECTS

■ Minesweeper Game (Campo DEIslado) && Data Analysis System

- Developed a Minesweeper-style game using Kotlin as the primary programming language.
- Implemented the game logic, including random bomb generation and recursive cell clearing.
- Applied Object-Oriented Programming (OOP) principles to ensure code modularity and readability.
- Managed project versioning and terminal-based user interface interactions.
- Developing a Java application to process and query demographic data (e.g., population count, geographic area, and density).
- Implementing efficient data structures to handle large sets of information for country-specific statistics.
- Utilizing Object-Oriented Programming (OOP) to create a modular and scalable codebase.
- Focusing on data retrieval logic and terminal-based user interaction.

CORE ENGINEERING COMPETENCIES

- Algorithmic Logic: Developing a strong foundation in computational thinking and structured problem-solving.
- Software Architecture: Understanding how to organize code efficiently using Object-Oriented Programming (OOP).
- Data Structures: Learning how to manage and manipulate data effectively through various collections and arrays.
- Version Control: Gaining familiarity with tools like Git to manage and track code development.

TECHNICAL SKILLS & SOFT SKILLS

- | | |
|---|-----------------------------------|
| • Kotlin Programming: Intermediate | • Problem Solving & Analytical |
| • Algorithms & Data Structures: Intermediate | • Thinking |
| • Object-Oriented Programming (OOP): Intermediate | • Critical Thinking & Observation |
| • Version Control (Git): Basic | • Adaptability & Fast Learner |
| | • Teamwork & Collaboration |

EXTRACURRICULAR INTERESTS.

- Exploring diverse computer science fields (web, software, games)
- Analyzing how software solutions apply to real-world problems
- Developing tools and scripts to automate daily tasks
- Participating in coding communities and tech forums
